

HuskyPC Windows Image Sharing Agreement

Statement of Understanding

University Information Technology Services (UITS) maintains a standard HuskyPC “One-Image” Operating System clone, which is backwards-compatible with current and previously-supported Windows client computers. This resource expedites re-installation and configurations for standard HuskyPC computers.

In an effort to maintain software and configuration standardization across campus, UITS is making the Windows HuskyPC computer “One-Image” available to authorized UConn IT support staff. A significant amount of research, collaboration, and testing has and continues to be invested in this resource. UITS requests that feedback be provided such that, together, this resource will continue to improve to meet many of the University’s combined computing needs.

The following is conditional for “One-Image” request and use:

- The “UITS Admin” account and password is to remain in place and un-changed.
- The image may be installed on University-owned faculty, staff, and lab **HuskyPC computers ONLY** (e.g. Dell Latitude and OptiPlex lines).
 - The image **may not** be installed on student computers, non-standard computers, personal (non-University owned) computers, or University-owned computer not purchased with the HuskyPC image.
- The recipient of the image assumes full responsibility and understands that that the image medium must not be shared with other individuals or departments.
- All requests for copies of the HuskyPC image must be directed through the UITS Business Office, MSB 049, 860.486.1781.
- Any updates to the HuskyPC image will be for the inclusion of department-specific software and settings. Any changes to the UITS configurations, accounts, and/or reverse engineering are not permitted.
- Ongoing efforts to collaborate and communicate improvements are made through the Software License Group (SLG) ad hoc team, working with UITS-TSS responsible to maintain the image.

By signing below, I agree to abide by the above.
